

What everyday AI work costs, model by model

A fixed set of four ordinary tasks, priced every month on each major model using real token counts and verified list prices. The same work, the same method, every month, so changes in cost are changes in the market.

By **Dr Santosh Kumar** · Token Bench

About this edition. This is the first official edition and the base for every edition that follows. All thirteen models from OpenAI, Anthropic and Google are now counted exactly, with each provider's own tokenizer. Models whose tokens can only be estimated are reported separately and kept out of the headline figures.

CHEAPEST FRONTIER	CHEAPEST MID-RANGE	CHEAPEST BUDGET
\$7.13	\$2.63	\$0.332
Gemini 4 Argon	Gemini 3.8 Flash	GPT-6 Luna
TASKS IN THE BASKET	MODELS TRACKED	PUBLISHED
4	17	Monthly
support, code, data, Hindi	13 counted exactly, 5 providers	on the 1st

1. Headline figures

Each figure is the cost of running all four tasks 1,000 times, in US dollars at standard list prices. Exact token counts only.

Tier	Cheapest model	Index value	Median of tier
Frontier	Gemini 4 Argon	\$7.13	\$23.08
Mid-range	Gemini 3.8 Flash	\$2.63	\$4.98
Budget	GPT-6 Luna	\$0.332	\$0.802

Same work, eight times the price. Claude Fable 5.1 costs \$57.69 for the basket, eight times Gemini 4 Argon's \$7.13. Part of that gap is the price list and part is the tokenizer: Claude's models use 889 prompt and 976 answer tokens for the basket, against 491 and 566 on OpenAI's.

2. Every exactly counted model

Tier	Model	Price in / out	Tokens in / out	Index value	With batch	Hindi multiple
Frontier	Gemini 4 Argon	\$2 / \$10	526 / 608	\$7.13	\$3.57	1.25×
Frontier	Gemini 3.1 Pro	\$2 / \$12	514 / 599	\$8.22	\$4.11	1.17×
Frontier	Claude Opus 5.5	\$4 / \$20	889 / 976	\$23.08	\$11.54	2.19×
Frontier	GPT-6 Astra	\$10 / \$50	491 / 566	\$33.21	\$16.61	1.46×

Budget	Claude Haiku 5.5	\$0.10 / \$0.50	889 / 976	\$0.577	\$0.288	2.19×
Budget	Gemini 3.1 Flash-Lite	\$0.25 / \$1.50	514 / 599	\$1.03	\$0.513	1.17×
Budget	Gemini 3.5 Flash-Lite	\$0.30 / \$2.50	514 / 599	\$1.65	\$0.826	1.17×

Prices are US dollars per million tokens. "With batch" is the cost through the provider's batch service, for work that can wait for results. "Hindi multiple" is the cost of the Hindi customer-support task divided by the cost of its English original. Models that share a tokenizer share token counts and Hindi multiples, so their index values differ only by price. Gemini 4 Argon has a new tokenizer, so it counts differently from the Gemini 3 models.

3. Finding of the month: Gemini 4 reshuffles the language tax

Gemini 4 Argon uses a new tokenizer. On the English tasks it counts within one token of Gemini 3. On Hindi it counts more, and in this basket it costs more than Gemini 3 in every Indian language measured.

A four-task basket is a small sample, so Token Bench checked the finding on 1,012 professionally translated sentences per language, counted on both models on 31 October 2026.

Language	Gemini 3 tokens	Gemini 4 Argon tokens	Change
Bengali	32,836	41,085	+25%
Tamil	39,830	48,325	+21%
Marathi	37,835	42,724	+13%
Hindi	35,521	39,337	+11%
Telugu	48,148	51,005	+6%
Punjabi	73,045	64,972	-11%
Odia	95,199	67,341	-29%
English	27,114	27,059	-0.2%

Argon needs more tokens for ten of the thirteen Indian languages measured, including the five most widely spoken. It needs fewer for Odia and Punjabi, and about the same for Nepali. Argon's price doubles to \$4 / \$20 per million tokens on 1 December 2026, so the extra tokens will cost twice as much from next month. Full results for all thirteen languages are in Token Bench's [Indian languages study](#).

Sentences from the FLORES+ benchmark, used under the CC BY-SA 4.0 licence. Only token counts are reported here, not the sentences.

4. Indian-language sub-index

Draft. The Hindi, Marathi, Bengali, Tamil and Telugu texts are draft translations, not yet reviewed by native speakers. These figures may change once they are.

What the customer-support task costs in each language, as a multiple of the same task in English. Exact counts only.

Model	Hindi	Marathi	Bengali	Tamil	Telugu
Gemini 4 Argon	1.25×	1.46×	1.37×	1.63×	1.77×
Gemini 3.1 Pro	1.17×	1.24×	1.14×	1.29×	1.68×
Claude Opus 5.5	2.19×	2.41×	2.65×	3.08×	2.86×
GPT-6 Astra	1.46×	1.78×	1.63×	1.94×	1.89×
Claude Fable 5.1	2.19×	2.41×	2.65×	3.08×	2.86×
Gemini 3.8 Flash	1.17×	1.25×	1.14×	1.30×	1.68×
GPT-6.1 Terra	1.46×	1.78×	1.63×	1.94×	1.89×
GPT-6.1 Sol	1.46×	1.78×	1.63×	1.94×	1.89×
Claude Sonnet 5.5	2.19×	2.41×	2.65×	3.08×	2.86×
GPT-6 Luna	1.46×	1.78×	1.63×	1.94×	1.89×
Claude Haiku 5.5	2.19×	2.41×	2.65×	3.08×	2.86×
Gemini 3.1 Flash-Lite	1.17×	1.24×	1.14×	1.29×	1.68×
Gemini 3.5 Flash-Lite	1.17×	1.24×	1.13×	1.28×	1.67×

The multiples are cost ratios, not token ratios. Each model prices input and output differently, so two models with the same tokenizer can differ by 0.01. The Indian languages study measures 1,012 short sentences, while this basket uses one longer reply per language, so the two give somewhat different multiples for the same language and model.

5. Estimated only

These providers publish no tokenizer, so their counts can only be estimated from the number of characters. Estimates are least reliable for non-English text, so these models are kept out of the headline figures and the sub-index.

Tier	Model	Provider	Price in / out per 1M	Index value (estimate)
Frontier	Grok 4.7	xAI	\$2 / \$6	\$4.06
Mid-range	Grok 4.3	xAI	\$1.25 / \$2.50	\$1.89
Mid-range	DeepSeek V4 Pro	DeepSeek	\$0.66 / \$1.98	\$1.34
Budget	DeepSeek V4.1 Flash	DeepSeek	\$0.15 / \$0.60	\$0.383

6. Price notes

- **Gemini 4 Argon:** price rises to \$4 / \$20 on 1 December 2026.
- **Gemini 3.8 Flash:** price rises to \$1.50 / \$7.50 on 1 January 2027.
- **DeepSeek V4 Pro and V4.1 Flash:** the off-peak rate is shown; peak hours cost double. The Search and Fetch tool fees DeepSeek introduced on 1 November 2026 are not token prices and don't affect the index.

7. Method

The basket is four everyday tasks: an English customer-support reply, a Python code review, an invoice extraction to JSON, and a Hindi translation of the customer-support task. Each has a prompt and a reference answer, so the index covers what a model reads and what it writes. The basket stays fixed, so later editions are directly comparable with this one. Its full text is in the appendix.

The index value for each model is the cost of running all four tasks 1,000 times:

$$1,000 \times \sum (\text{prompt tokens} \times \text{input price} + \text{answer tokens} \times \text{output price}) \div 1,000,000$$

Token counts come from each provider's own tokenizer: OpenAI's o200k tokenizer, run in-house, and the counting services of Anthropic and Google, minus the fixed overhead each adds to every request. Counts are re-measured when a provider releases a new model or changes a tokenizer.

Prices are standard list prices for real-time use, without caching, checked against each provider's official pricing page in the week before each edition. Where a price change has been announced, the price in force on the edition date is used. Secondary sources are never used for prices.

Corrections backed by an official provider page are applied, dated and noted in the next edition.

What the index doesn't measure

Quality. A cheaper model may do a task worse, or need more attempts. The index measures what the same work costs, not how well it's done.

Hidden reasoning. Reasoning models also bill their internal thinking as output, and how much they think varies by model and request. The index uses fixed reference answers so editions stay comparable; real bills from reasoning models will be higher.

You are a support assistant for an online electronics store. Reply to the customer politely and in under 120 words, using only the order details below. If something isn't covered, say you'll pass the question to a colleague.

Order 58213: one pair of wireless earbuds, paid by card on 3 October, dispatched on 6 October by courier, tracking number not yet active.

Customer: Hi, I ordered earbuds last week and the tracking link still shows nothing. Have they actually been sent? I need them before I travel on Saturday.

Reference answer

Hello, and thank you for getting in touch. Your earbuds were dispatched by courier on 6 October, so they are on their way. Tracking numbers sometimes take a day or two to activate after dispatch, which is why the link isn't showing anything yet. Courier deliveries usually arrive within three to five working days, but I can't promise delivery before Saturday from the details I have. I've passed your question to a colleague in our dispatch team, who can check with the courier and confirm whether the parcel will reach you in time. We'll email you as soon as we hear back. Thank you for your patience.

code-review Code review · Python

Prompt

Review this Python code. List any bugs and give a corrected version.

```
```python
def average_order_value(orders):
 total = 0
 for order in orders:
 total += order['amount']
 return total / len(orders)

def top_customers(orders, n=3):
 totals = {}
 for o in orders:
 totals[o['customer']] = totals.get(o['customer'], 0) + o['amount']
 return sorted(totals, key=totals.get)[:n]
```
```

Reference answer

Two bugs:

1. `average\_order\_value` divides by zero when `orders` is empty.
2. `top\_customers` sorts in ascending order, so it returns the customers who spent least, not most.

Corrected version:

```
```python
def average_order_value(orders):
 if not orders:
 return 0.0
 return sum(o['amount'] for o in orders) / len(orders)

def top_customers(orders, n=3):
 totals = {}
 for o in orders:
 totals[o['customer']] = totals.get(o['customer'], 0) + o['amount']
 return sorted(totals, key=totals.get, reverse=True)[:n]
```

ऑर्डर 58213: वायरलेस ईयरबड्स की एक जोड़ी, 3 अक्टूबर को कार्ड से भुगतान, 6 अक्टूबर को कूरियर से भेजी गई, ट्रैकिंग नंबर अभी सक्रिय नहीं है।

ग्राहक: नमस्ते, मैंने पिछले हफ्ते ईयरबड्स ऑर्डर किए थे और ट्रैकिंग लिंक पर अब भी कुछ नहीं दिख रहा। क्या वे सच में भेजे गए हैं? मुझे शनिवार को यात्रा से पहले उनकी ज़रूरत है।

Reference answer

नमस्ते, संपर्क करने के लिए धन्यवाद। आपके ईयरबड्स 6 अक्टूबर को कूरियर से भेज दिए गए हैं, इसलिए वे रास्ते में हैं। कभी-कभी भेजे जाने के बाद ट्रैकिंग नंबर सक्रिय होने में एक-दो दिन लगते हैं, इसीलिए लिंक पर अभी कुछ नहीं दिख रहा। कूरियर डिलीवरी आमतौर पर तीन से पाँच कार्यदिवसों में पहुँचती है, लेकिन मेरे पास मौजूद जानकारी से मैं शनिवार से पहले डिलीवरी का वादा नहीं कर सकता। मैंने आपका सवाल हमारी डिस्पैच टीम के एक सहकर्मी को भेज दिया है, जो कूरियर से पता करके बताएँगे कि पार्सल समय पर पहुँचेगा या नहीं। जवाब मिलते ही हम आपको ईमेल करेंगे। धैर्य रखने के लिए धन्यवाद।

नमस्कार, संपर्क साधल्याबद्दल धन्यवाद. तुमचे इअरबड्स 6 ऑक्टोबरला कुरिअरने पाठवले गेले आहेत, त्यामुळे ते वाटेवर आहेत. पाठवल्यानंतर ट्रॅकिंग नंबर सक्रिय होण्यास कधीकधी एक-दोन दिवस लागतात, म्हणूनच लिंकवर अजून काही दिसत नाही. कुरिअर डिलिव्हरी साधारणपणे तीन ते पाच कामकाजाच्या दिवसांत पोहोचते, पण माझ्याकडील माहितीवरून मी शनिवारपूर्वी डिलिव्हरीचे आश्वासन देऊ शकत नाही. मी तुमचा प्रश्न आमच्या डिस्पॅच टीममधील एका सहकाऱ्याकडे पाठवला आहे, जे कुरिअरकडे चौकशी करून पार्सल वेळेत पोहोचेल की नाही ते कळवतील. उत्तर मिळताच आम्ही तुम्हाला ईमेल करू. धीर धरल्याबद्दल धन्यवाद.
